

Arjun Nanduri

Berkeley, CA | arjunnanduri@gmail.com | (407)-580-8788 | linkedin.com/in/arjunnanduri | github.com/FavouritePlayer

Education

University of California: Berkeley, BA in Computer Science

Expected May 2027

- GPA: 3.972
- Courses: Probability & Stochastic Processes, Machine Learning, Computer Security, Data Structures

Projects

Scripted Survey Browser AI Agent, *CalHacks Prize Winner*

<https://devpost.com/software/potbot>

- Won sponsor prize at CalHacks — led team of 3, owned backend and CV pipeline; made key scoping decision to ship working SF demo in 36 hours over unfinished feature set.
- Built agentic pipeline using a Llama vision model to validate infrastructure damage photos and auto-submit repair requests to SF city government via Playwright browser automation.

Travel Tracker Web App (ReactJS, Firebase)

github.com/FavouritePlayer/Glimpses

- Built full-stack web app for mapping and visualizing personal travel memories, delivering a Spotify Wrapped-style breakdown of destinations, time spent, and journey patterns; pitched to Telora VC in Miami.

Experience

Software Engineer, Aver Technologies Inc. – Virginia

Aug 2025 – Present

- Building a computer vision pipeline in PyTorch to automate construction pile depth tracking, replacing a manual Department of Transport submission process.
- Designing two-phase roadmap: Phase 1 CV digitization of manual process, Phase 2 LIDAR elimination of line markings.

Software Engineering Intern, CACI International Inc. – Virginia

May 2025 – Aug 2025

- Built a full-stack web app for U.S. Customs field officers using Angular, Spring Boot, and PostgreSQL.
- Expanded database test coverage by 20%, enhancing system stability and enabling more efficient bug detection.
- Ramped quickly onto unfamiliar enterprise Spring Boot codebase in Agile team, contributing through sprint planning, standups, and code reviews.

Data Science Research Intern, CDSS, UC Berkeley – Berkeley, CA

Jan 2025 – May 2025

- Fine-tuned BART transformer for Ancient Akkadian lemmatization in low-resource settings, achieving 15% improvement over open-source baselines via custom distance metric.

Software Engineering Intern, Floras – Berkeley, CA

Sep 2024 – Dec 2024

- Built a Flutter mobile app for carbon offset purchases, integrating Patch.io to display ESG data by region.
- Implemented secure user authentication and token management.

Software Engineering Intern, IT Hired Guns Inc. – Orlando, FL

Jan 2023 – Aug 2024

- Published B2C cross-platform loyalty apps (e.g., HotSpot, Kenjo) for unbranded gas stations using Flutter.
- Integrated location services and backend APIs to deliver dynamic updates on nearby stations, fuel prices, and offers.

Skills

Languages: Python, Java, JavaScript, SQL, Dart, Scheme

Technologies: React.js, Angular, Spring Boot, Flutter, Next.js, Firebase, AWS, MongoDB, Excel, Git, PyTorch, scikit-learn, Pandas.
